

Technical Data Sheet **Infinity Bond MMA 300**

MMA 300 Technical Data Sheet (TDS)

Description of Infinity Bond MMA 300

Infinity Bond MMA 300 is a 1:1 fast setting Methacrylate adhesive great for bonding metals, engineered plastics and fiberglass. MMA 300 works with minimal surface preparation and has excellent shock and impact resistance. MMA 300 also provides a durable bond even when exposed to heavy thermal cycling and extreme temperature conditions.

Features of Infinity Bond MMA 300

- No Surface preparation requred
- Excellent weathering properties
- Great shock and impact resistance
- Strong, structural bond

Viscosity @ 25°C (cns):

• 1:1 mix ratio - easy to dispense

Properties of Infinity Bond MMA 300

Uncured

viscosity \otimes 25 \circ (ops).	
Resin	40,000 – 80,000
Activator	80,000 – 120,000
Color	
Mixed Density	8.60
Mix Ratio:	
By Volume	1 to 1
By Weight	1 to 1
Thixotropic Index	4 - 5
Flash Point	51°F
Cured Properties	
Shear Strength, psi	1750-2800
Tensile Strength, psi	2500-3500

Technical Data Sheet **Infinity Bond MMA 300**

Application and Handling Guidelines

The product is best used at temperatures between 65 °F and 80 °F. Temperatures below 65 °F will slow the cure speed of the material and viscosities will be higher. Temperatures above 80 °F will cause the material to cure faster and viscosities will be lower. For consistent dispensing maintain temperature in the above mentioned range.

For optimum bond strength and to insure maximum performance in the finished assembly, join parts together within the specified work time of the adhesive. Make sure the bond joint has uniform coverage and that a sufficient amount of adhesive is in the bond area. It is important to have the adhesive applied, parts aligned and positioned, within the established work times for the product. To ensure maximum performance in the finished assembly parts should remain undisturbed until the fixture time is reached.

Clean up is best before the adhesive has cured. Cleaners containing acetone or Citrus terpene provide the best results. On cured adhesive repeat use may be required.

Precautions

Infinity Bond MMA 300 is flammable. Keep away from heat, spark, and open flames. KEEP OUT OF REACH OF CHILDREN. THE PRODUCT IS FOR INDUSTRIAL USE ONLY. Keep containers closed when not in use. Avoid contact with skin and eyes. Harmful if swallowed. Refer to Material Safety Data Sheet for complete safety information.

Storage and Shelf Life

The shelf life of the Infinity Bond MMA 300 is 12 months from date of shipment. Shelf life is based on the products being stored properly at temperatures between 55 °F and 75 °F. Exposure to temperatures above 75 °F will reduce the shelf life of these materials. These products should

NEVER BE FROZEN.

Note

This data is furnished for information only and are believed to be reliable. We cannot assume responsibility for the results obtained by others over whose methods we have no control. It is recommended that the product be tested in the application for which it is to be used.
