

Quality Products from Hawkeye Industries Inc.

## Aqua -Buff® Tuff-Stuff™ Rapid Cut Compound

**Water-based rapid-cut compound for composites and other surfaces**

### Usage

To remove scratches and polish composite patterns, plugs, masters and product molds. Also to remove scratches and to clean FRP parts, metals and painted surfaces.

### Features

Aqua-Buff products are economical, easy-to-use and produce superior results.

Here's why you should choose Aqua-Buff® Tuff-Stuff™ Rapid Cut Compound—

**Fast**—scratches removed quickly.

**Easy application**—handy refillable squeeze bottle.

**Water-based**—environmentally friendly.

**Economical**—use only a small amount.

**Application**—Working on an area about 1' by 3', apply Tuff-Stuff in three (3) quarter-size spots, each about foot apart to the surface that is to be compounded. Using a professional buffer, buff with a wool or wool-blend buffing pad. The surface should look wet. If not, apply more Tuff-Stuff. Buffing speeds will vary depending on individual buffing styles, but buffing at too high of a speed ( $\geq 2500$  rpm) can cause surface burning. Buff the surface with Tuff-Stuff until the haze is eliminated. Repeat the process to eliminate scratches from exceptionally hard surfaces. Follow with Aqua-Buff GlossMaster Polish for the ultimate shine.
